

GOOD FOR COMPOST TEA

Net Weight: 3 pounds

Has the ideal combination of soluble extracts of seaweed, and humic and fulvic acids to accelerate both bacterial and fungal proliferation.

Guaranteed Analysis

Soluble Potash (K_2O).....15.0%
Derived from: Soluble extracts of seaweed and potassium humate.

Application: Add 3 oz (weight) per 50 gallons of tea when brewing begins, another 3 oz mid-way through the brewing process, and another 3 oz near the end of the brewing cycle. For subsequent applications, mix ½ pound per 100 gallons of water and spray leaves to point of runoff 3-7 days after initial tea application. For best results dissolve powder in 1-2 gallons of warm water before adding to tank.
