

# GOOD FOR TURF

Net Weight: 3 pounds

Greatly increases resistance to stress from drought, heat, and to internal and external physiological stress such as mowing, foot traffic, and wide temperature fluctuations.

### Guaranteed Analysis

Soluble Potash (K<sub>2</sub>O).....15.0%  
Derived from: Soluble extracts of seaweed and potassium humate.

**Application:** Mix 1-pound per 100 gallons of water. Start foliar applications at initial growth stage and continue at 3-4 week intervals. Make additional applications immediately after periods of stress or heavy use, to newly applied sod, and as a late season spray to help improve resistance to winter-kill and frost damage. For best results dissolve powder in 1-2 gallons of warm water before adding to tank.
