

## PREMERGE

Developed by Iowa State University, Premerge contains 1005 corn gluten, a naturally occurring substance, which inhibit the growth of a seed's tiny feeder roots. This causes the weed seedlings to die before they germinate.

**Premerge controls these common weeds:**  
*broadleaf weed preventative*

<ul style="list-style-type: none"><li>• Barnyardgrass</li><li>• Smooth Crabgrass</li><li>• Curly Dock</li><li>• Green Foxtail</li><li>• Black Nightshade</li><li>• Orchardgrass</li><li>• Shattercrane</li><li>• Purslane</li><li>• Woolly Cupgrass</li><li>• Giant Foxtail</li><li>• Lambs Quarters</li></ul>	<ul style="list-style-type: none"><li>• Buckhorn Plantain</li><li>• Quackgrass</li><li>• Velvetleaf</li><li>• Annual Bluegrass</li><li>• Dandelions</li><li>• Creeping Bentgrass</li><li>• Black Medic</li><li>• Redroot Pigweed</li><li>• Catchweed Budstraw</li><li>• Clover</li></ul>
--	--

Apply in early Spring, 3 to 5 weeks before the weeds begin to sprout. About the time the crocus and daffodils are blooming.

### TREATMENT COVERAGE

**5-10 lbs. per 250 square feet**

20 lb. bag available for lawn area

6 lb. bag available for mulch and ornamental areas.
