

# WeedBan

**Fertrell WeedBan** is a product from the corn processing industry, and safe for the environment. It won't be harmful to children and pets, even immediately after application.

**Guaranteed Analysis:**

Total Nitrogen (N) . . . . . 10%  
8.81% Water Insoluble Nitrogen  
1.19% Water Soluble Nitrogen

Active Ingredient: Corn Gluten Meal  
Inert Ingredients: None

**Weed Control:**

Research studies have proven corn gluten meal effective as an all natural pre-emergent weed control. Through repeated use, *Fertrell WeedBan* will control the emergence of crabgrass, clover, dandelions, lamb's quarter, foxtail, purslane, creeping bentgrass, pigweed, barnyard grass and Bermuda grass. However, already established weeds will not be killed.

**Fertilizer:**

The nitrogen in *Fertrell WeedBan* is making it an excellent source of slow releasing fertilizer. Since it is slow release, it will feed your lawn over a long period of time.

**Application Rate**

We recommend an early spring and a fall application. The application rate for lawn is 20# per 1000 square ft. For lawns the spreader setting should be about 2/3 open. For gardens work *Fertrell WeedBan* into 2-3 inches of topsoil. After application, the lawn or garden should be deeply watered.

**DO NOT USE PRODUCT AT LEAST 60 DAYS PRIOR TO SEEDING OR ON NEWLY SEEDED AREAS**
