BONIDE®

For better distribution and adhesion. Helps reduce leaching and total pesticide use. Increases the effectiveness of lawn & garden chemicals

BONIDE TURBO SPREADER STICKER

TURBO Spreader-Sticker is a biodegradable, combination spreading sticking and penetrant agent designed to provide better distribution and adhesion of all types of insecticides, herbicides and fungicides (liquids or wettable powders).

TURBO helps your chemicals stick to the leaf of the plant and spread out evenly on the leaf to maximize effectiveness. By providing better distribution and adhesion of lawn & garden chemicals you can achieve greater effectiveness from your sprays and reduce leaching and product waste.

With TURBO each application has greater effectiveness allowing you to achieve control of insects and diseases faster and with fewer applications, thus reducing your usage of insecticides, herbicides and fungicides.

DIRECTIONS FOR USE

Add TURBO to your spray tank only after other spray materials have been added and mixed. Mix TURBO with 10 parts water to make a finished spray additive then add finished material according to the following rates.

Insecticide and Fungicides on Fruits, Vegetables and Ornamental Plants: 2 tbsp./gallon; **Herbicides**: 2 tbsp./gallon; **Defoliants** 3 tbsp./gallon.
